

Richard M. LaBarge

Partner

Tel 312.474.6646
rlabarge@marshallip.com

Having written and helped clients obtain hundreds of U.S. patents and register over a thousand U.S. trademarks, Richard M. LaBarge enjoys partnering with clients to assemble the available forms of intellectual property protection into a strong, tight set of rights. Recognized for his efficient handling of unusual situations, he led the successful opposition to the registration of the “thumpa-thumpa” sound of motorcycles as a federal trademark, is one of the few lawyers to have successfully registered a color alone as a trademark, and once secured allowance of an application to register the taste of apples as a trademark. He is currently coordinating the international trademark portfolios of several pharmaceutical companies, registering the U.S. trademarks of Korea’s leading consumer electronics company, and handling the international portfolio for another of the world’s leading consumer products companies.

In addition to his Martindale-Hubbell® AV Peer Review Rating™, he has been selected by the *Law Bulletin Publishing Company’s* Leading Lawyers division as a “Leading Lawyer.” In 2013, he was selected as a “Top Rated Lawyer in Intellectual Property” by *American Lawyer Media (ALM)* and Martindale-Hubbell. He was also recognized by the *World Trademark Review (WTR)* since 2014 in the *WTR 1000* rankings. He was also selected by his peers for inclusion in the 2018–2019 editions of *The Best Lawyers in America*® in the practice area of Patent Law.

Practices

- Design Patents
- Patent Prosecution
- Trademarks

Industries

- Consumer Products
- Industrial & Mechanical Technologies
- Insurance & Financial Services
- Pharmaceutical

Representative Matters

- Tailored an efficient suite of protection for a consumer goods company and its new style of paper packaging products. Under time pressure, he devised an effective strategy to consolidate the number of filings while also providing a broader scope of protection than commonly seen in the industry. This approach provided better control and market benefits for the company by making it tougher for competitors to copy without infringing, while also reducing client costs.
- In a litigious industry, combined utility patent and design patent filings for a world-leading manufacturer to provide broad protection for a new line of innovative sprayer products that help to prevent the spread of mosquito-borne diseases. This approach is helping to secure the client's line in the marketplace and may help to provide defenses or possible counterclaims if competitors assert unjustified claims against the client.

Background and Credentials

The patents and trademark registrations that he has helped to obtain cover a wide range of products, and Richard M. LaBarge has gained particular experience with consumer products companies and pharmaceutical companies. His litigation practice has brought him before U.S. district courts throughout the nation as well as before the Trademark Trial and Appeal Board for the U.S. Patent and Trademark Office and the U.S. International Trade Commission.

Internationally, he works closely with foreign agents in obtaining and enforcing foreign trademark rights, efficiently coordinating resolution of issues on a multi-national basis.

Mr. LaBarge brings an engineer's mindset to his work. He is not just analytical, but also passionate about identifying the essence of what makes products and marketing valuable. He helps guides clients to portfolio of rights that efficiently and forcefully protects the most critical aspects of their business. In trademark counseling, he recognized—before “trademark bullying” became a buzzword—that overzealous trademark policing can damage something even more valuable than a company's mark: its reputation.

Education

- Wake Forest University School of Law (J.D.)
- University of Illinois, Urbana-Champaign (B.S.)
 - Civil Engineering
